

Project: 3D Chess Gameplay:-

This is a simple multiplayer 3D chess game fully developed in JavaScript and HTML5 adding CSS to give it a nice looking and finishing touch. This project is validated with JavaScript and JQuery. In whole this project uses a lot of JavaScript and JavaScript Libraries.

Just a simple game with the pick and drop your set pieces with the mouse and continue playing with friends.

Gameplay:-

1. To run this game, use VS Code editor for good live server support.
2. Download and open this project in your code editor.
3. Then there is an index.html file. Run that file in live server.
4. Use Google Chrome or FireFox for better user experience.
5. Once you open the game, you can see the home screen with game menus in it.
6. You can select the game mode you want to play.
7. Also, you can customize the gameplay settings according to your preferences.
8. According to checkmate, you will be the winner.
9. You can reload if done any mistakes.
